AI Readiness Assessment Toolkit

Evaluate Your Organization's AI Readiness

A self-assessment framework for enterprise leaders

Why AI Readiness Matters

Organizations that adopt AI strategically see 20-30% improvements in operational efficiency, revenue growth, and competitive positioning. But rushing into AI without a clear assessment of your readiness leads to failed pilots, wasted budgets, and organizational resistance.

This toolkit gives you a structured framework to evaluate where your organization stands across five critical dimensions of AI readiness — and a clear action plan for what to do next.

The Five Dimensions of AI Readiness

1. Data Readiness

Do you have the data infrastructure, quality, and governance to support AI? Are your data sources integrated, clean, and accessible?

2. Technology Infrastructure

Is your technology stack capable of supporting AI workloads? Do you have cloud infrastructure, APIs, and integration capabilities?

3. Talent & Skills

Does your team have the skills to implement and manage AI? Do you have business analysts who can bridge the gap between business needs and AI capabilities?

4. Leadership & Culture

Is your leadership committed to AI adoption? Is there organizational willingness to change processes and embrace data-driven decision-making?

5. Strategy & Governance

Do you have a clear AI strategy aligned with business objectives? Are there governance frameworks for ethics, compliance, and risk management?

AI Readiness Scorecard

Rate your organization on each dimension from 1 (Not Started) to 5 (Advanced). Total your score and use the key below to determine your readiness level.

Dimension	1	2	3	4	5	Score
Data Readiness						___
Technology Infrastructure						___
Talent & Skills						___
Leadership & Culture						___
Strategy & Governance						___
					TOTAL:	___

Scoring Key:

5-10: Early Stage

AI is not yet on your strategic agenda. Start with awareness building and use case identification.

11-15: Exploring

You have some foundational elements. Focus on data quality and pilot project identification.

16-20: Developing

Solid foundation in place. Prioritize talent development and governance frameworks.

21-25: Advanced

You are AI-ready. Focus on scaling successful pilots and building competitive advantage.

30-Day AI Readiness Action Plan

Week 1: Assess

- ✓ Complete the AI Readiness Scorecard with your leadership team
- ✓ Identify your top 3 business processes that could benefit from AI
- ✓ Audit your current data assets and infrastructure
- ✓ Survey your team on AI awareness and skill levels

Week 2: Prioritize

- ✓ Rank AI use cases by business impact and feasibility
- ✓ Identify quick wins (high impact, low complexity)
- ✓ Map your technology gaps against requirements
- ✓ Research potential AI vendors and platforms

Week 3: Plan

- ✓ Draft a 90-day AI pilot project proposal
- ✓ Define success metrics and KPIs for your first AI initiative
- ✓ Create a talent development plan (upskilling vs hiring)
- ✓ Establish an AI governance committee

Week 4: Mobilize

- ✓ Present your AI strategy to executive leadership
- ✓ Secure budget and sponsorship for your pilot
- ✓ Begin vendor evaluations or platform setup
- ✓ Schedule team training on AI fundamentals
